DETAILED ACTION

Response to Amendment

The Amendment, filed on September 27, 2006, has been entered and acknowledged by the Examiner.

Claims 1-17 are pending in the instant application.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims,

This application is in condition for allowance except for the presence of claims 1-13 directed to inventions non-elected without traverse. Accordingly, **claims 1-13 have been cancelled.**

Allowable Subject Matter

Claims 14-17 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

Applicant's submission of the priority papers English translation overcomes the outstanding prior art rejection.

Regarding claim 14, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 14, and specifically comprising the limitation

of a first electrode layer, a decomposition removal layer which is in the form of pattern on the first electrode layer or on an electric charge injection transportation layer formed on the first electrode layer, and shows different contact angle with liquid from that of the first electrode layer or the electric charge injection transportation layer, an organic electroluminescent layer which is in the form of pattern on the electrode layer or on electric charge injection transportation layer exposed by decomposition and removal of the decomposition removal layer and contains at least a light emitting layer, and a second electrode layer formed on the organic electroluminescent layer. Claim 16 is allowable for the same reasons stated above, because of its dependency status from claim 14.

Regarding claim 15, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 15, and specifically comprising the limitation of a first electrode layer, a decomposition removal layer which is in the form of pattern on the first electrode layer or an electric charge injection transportation layer formed on the first electrode layer, and has an electric charge shielding property, an organic electroluminescent layer which is formed so as to coat the first electrode layer and decomposition removal layer and contains at least a light emitting layer, and a second electrode layer formed on the organic electroluminescent layer. Claim 17 is allowable for the same reasons stated above, because of its dependency status from claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
